Time: 10am-5pm

Duration: 24 Hours

Beginning Visual InterDev 6

Why and for who?

Visual InterDev provides the most comprehensive set of high-performance visual development tools for creating dynamic Web Applications for a company intranet or a site on the World Wide Web. Learning on the major technologies behind web development, including HTML, DHTML XML and object oriented programming. Explore how to incorporate data from databases into your pages using Active Server Pages and ActiveX Data Objects, and write pages containing VBScript, JavaScript and ActiveX components. You will create lots of useful samples for your real-life applications and will be encouraged to practice at every step of the way.

This training is intended for Web Designer, Web Developer, System Developers and Software Developers

What will you learn?

During the training, we provide hand-on, step-by-step instructions on how to accomplish our course objectives:

- Basics of Web Design
- Installing Visual InterDev
- Visual InterDev - Quick Tour
- Managing Style and Site Navigation
- Database Basics
- Client Side Script
- Writing Active Server Pages
- Design Time Controls
- XML in Web Applications
- Database Access With Ado
- Error Handling And Debugging
- Creating Code Components
- Deployment and Designing For The Bigger Picture
- Case Study - Intranet Help Desk
