# Web Page Design

**Time: 10am-5pm**

**Duration: 18 Hours**

## Why and for who?

**Web Page Design** is a hands-on course that lays the foundation for mastering the **HTML web** publishing language. It is a course meant for participants who are interested in learning on how to use web page building blocks (HTML, FTP, Web Server, Email, Flash banner) to create professional Web Pages for his/her company.

You **don't** have to be a technician or information technology specialists to learn this course. This course is suitable for those who wants to contribute to a Web Site or company Intranet. Although, you had already use a Hyper-text Markup Language editor for the sake of speed, a thorough understanding of the language allows you to have more control and flexibility. Furthermore, attending this course will broaden your horizon on knowledge of JavaScript, VBScript, FTP and many more.

## What will you learn?

**Web Page Design Manual** is given out for FREE during the Web Page Design Class. The manual contains brief but compact explanations about each chapters, HTML source codes and output screenshots for your better understanding. Therefore, it is unnecessary for you to jot down notes as you can always refer back to this manual for guidance.

**Web Page Design CD** features FREE 10 attractive Web Site Templates and collections of ready-to-use JavaScript source code. You can choose any Web Site Template for your company Web Site and customized the templates to meet your needs. You do not have to write your own JavaScript codes but just with easy copy and paste operations, you can directly use or re-edit the JavaScript codes. You can use this CD to enhance your web pages and web design skills.
